PERFECTION NEEDS EXPERTISE WITH EXPERIENCE
- WE HAVE IT

LEAVES NO STONE UNTURNED FOR BETTER PROFITABILITY

Why RUKY?

Among the perennial challenges being faced by infrastructure companies is shortage of skilled technical team with experience in managing projects. Many companies attempt to fill this vacuum by recruiting skilled manpower - an endeavor with inherent risks related to getting the right manpower as well as high attrition rates which in turn make the company lose out on time and resources. A plethora of other challenges which are causes for many projects facing colossal risks are improper document management, time & cost overrun, poor risk assessment during pre-tender & execution stages, no or untimely risk mitigation.

In a large number of cases non-availability of contract specialists results in inability to act upon the projects legitimate claims which in turn leads to inactive justification/defence for counter claims.

Many a multiple adversities being met by the construction sector are economic pressure, owing to unsuitable estimations of quantities & cost calculations in EPC tenders, unviable bidding as a outcome of awesome competition to garner projects and to identify the claims during & after execution of work, non-availability of qualified and experienced Project Management team at site etc. The relevance and necessitation of **RUKY** comes into forte against this challenging background.
